

Optatec, Frankfurt

Welcome at Optatec in Frankfurt, the international trade fair for optical technologies, components and systems, which is the industry event for an enormous future market.

Visit us at our booth from May 15 - 17, 2018 and meet with our experts for specific advice. Try our special action points at our booth F25, hall 3.0.

Enabling Innovative Optical Solutions at three Production Sites

Balzers, Jena and Malaysia

The continuous innovation, quality improvements and additions of expertise and production sites in Liechtenstein, Germany and Malaysia by Optics Balzers, will continue to support customers' innovative product development efforts with Optics Balzers as a trusted, reliable, and innovative partner...

New Manager at our Business Development Department

We are glad to introduce our new Manager Business Development:

Reto Keller

reto.keller@opticsbalzers.com

Reto has several years of experience in Fibre Optics and the Telecommunication market where he has been working in international positions throughout his career.

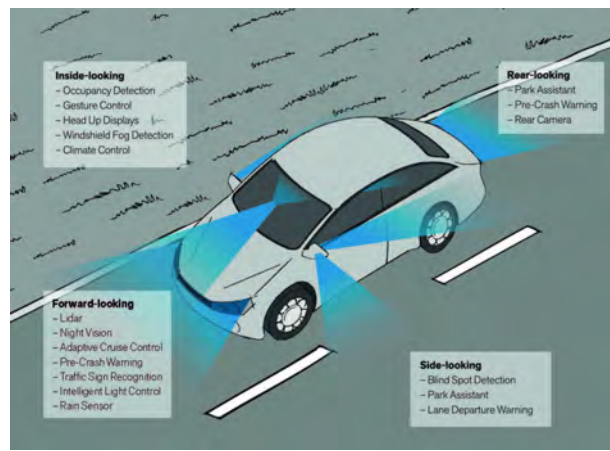

At Optics Balzers Reto will be responsible to drive our business with new applications in emerging markets.

Feel free to contact us now and explore the entire spectrum of our Components. Our dedicated team is looking forward to your request.

Optics Balzers and WaveOptics: Partnership for Diffractive Waveguide Production

Optics Balzers and WaveOptics collaborate to industrialize diffractive waveguide manufacturing for near-eye display applications. They aim to scale up the production of high quality waveguides for consumer AR glasses.

Order Sorting Filters

New Datasheet available

Miniaturized photospectrometers are an integral part of an increasing number of optical systems. A compact and cost effective set-up for such minispectrometers is based on a fixed grating for wavelength separation. However, using diffraction gratings one has to face higher diffraction orders which have to be eliminated. One way to effectively achieve their suppression is to use well positioned longpass filters...

Our next Events...

VDI Optical Technologies in Automotive Engineering, Karlsruhe

Under the professional sponsorship of the VDI / VDE Society for Measurement and Automation Technology (GMA), experts at the "Optical Technologies in Automotive Engineering" conference in June 2018 are already picking up the industry's rapid development for the eighth time.

As the global market leader, Optics Balzers focuses on high-tech markets such as automotive. Visit our stand at the VDI conference from June 5 - 6, 2018 and find out about the unique solutions.

Lasys, Stuttgart

Welcome to Lasys in Stuttgart from June 5 - 7, 2018. Come to our booth A16 in hall 4 to discover the unique solutions and the wide variety of applications that optical components allow.

We look forward to welcoming you as our guest.
